July 2003

INTRODUCTION

This report contains vital statistics data for South Carolina events that occurred in 2001. The purpose of this report is to provide basic reference data for a variety of users. Vital Statistics certificates filed with the Office of Public Health Statistics and Information Services of the South Carolina Department of Health and Environmental Control are the primary source of data presented in this report. These records include certificates of live births, deaths, marriages, divorces and annulments and reports of fetal deaths and abortions. Data are presented for South Carolina, its 46 counties and places of 2,500 or more population. Live births, fetal deaths and deaths occurring out-of-state to South Carolina residents are also included in this report. Event information is re-allocated to the state of residence through an agreement of interstate transcript exchange.

In South Carolina, all birth, fetal death, and death certificates are filed by hospitals, physicians, coroners, midwives and funeral directors in the county health department where the event occurred. Each county health department forwards the certificates weekly to the Office of Vital Records. In 1992, South Carolina established the Electronic Birth Certificate (EBC) system. This allows hospitals to file all birth certificate information by computer. By the end of 1997, 100% of the births in South Carolina were being filed via the EBC system. Marriage and divorce certificates are transmitted to this office from the County Probate Court and Clerk of Court respectively.

Population estimates for the intercensal years were prepared by the Office of Research and Statistics of the South Carolina Budget and Control Board under the Federal-State Cooperative Program of population estimating for local areas. The Disease Control and Epidemiology Division of the South Carolina Department of Health and Environmental Control furnished the morbidity data.

This report is available in CD format as well as in printed format. This and other reports on South Carolina vital statistics are available on the internet at the web address listed below. Click on the Public Health Statistics and Information Services link under the heading Health Information.

BIRTHS

The month with most births: August (5,091) Least Births: April (4,316)
 Youngest Mother: 12 years old Oldest Mother: 51 years old
 The Biggest baby: 14 lb 13 oz or 6,407 grams

DEATHS

The month with the most deaths: January (3,478) Least deaths: September (2,708)
 The oldest person that died: 116 years old

MARRIAGES

The youngest bride: 15 years old The youngest groom: 16 years old
 The oldest bride: 89 years old The oldest groom: 99 years old
 The month with the most marriages: June (4,629) Least marriages: January (1,907)

DIVORCES

The youngest bride to divorce: 15 years old The youngest groom to divorce: 18 years old
 The oldest bride to divorce: 89 years old The oldest groom to divorce: 95 years old
 The month with the most divorces: June (1,488) Least divorces: July (1,044)
 Greatest number of divorces for bride: 9 For groom: 9

Life Expectancy

Table A-5. presents the average remaining lifetime (i.e., average number of years of life remaining at the beginning of the age interval) for South Carolinians by single year of age for 1989-1991. These tables are based on age specific death rates of South Carolina Residents for 1989-1991. The death rates were calculated using data from the 1990 Census of Population and deaths occurring in the United States to residents of South Carolina. Presented are tables for the total population by race and gender.

For more detailed information, please refer to the 1998 publication U.S. Decennial Life Tables for 1989-1991, Volume II, State Life Tables Number 41, South Carolina. Published by the U.S. Department of Health and Human Services, Center for Disease Control and Prevention, National Center for Health Statistics.

The State Fruit

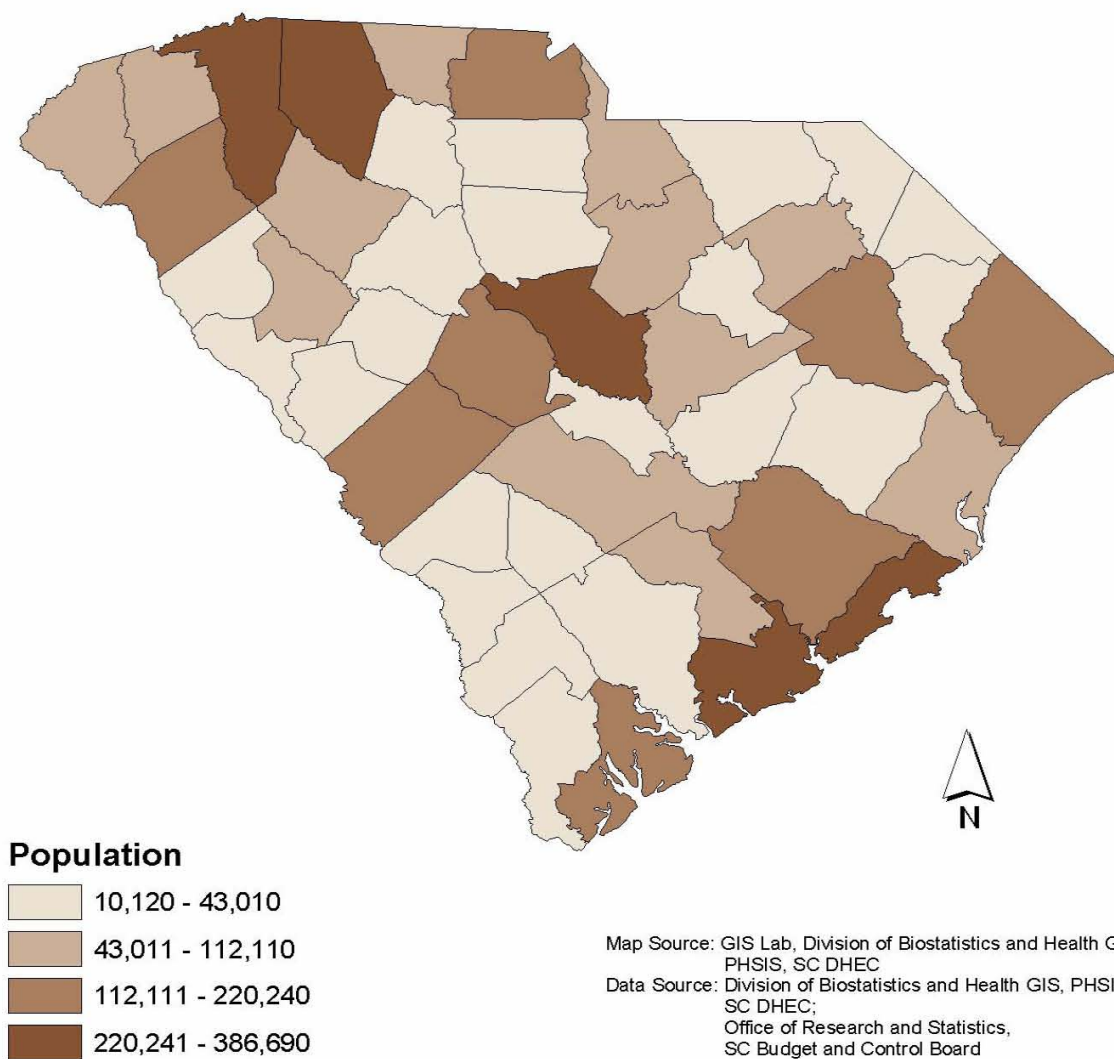

“ The Peach ”

Officially adopted by the General Assembly in 1984

POPULATION

Figure B-1
South Carolina Census Population by County
2001

SUMMARY OF POPULATION

The Census population of South Carolina for 2000 was 4,012,012 an increase of 126,272 from the 1999 estimated population of 3,885,740. The 2000 population showed an increase of 15.1 percent over the 1990 Census population of 3,486,703.

1990 and 2000 CENSUS OF POPULATION

Population Density: In 1990, the population density (number of person per square mile of land area) of South Carolina was approximately 115.8. Based on the 2000 census count, the population density had increased to 133.2, a 15.0 percent increase. Approximately 67.4 percent of the 46 counties in South Carolina had population densities less than that of the state in 1990, and 7 of these counties actually had less than 40 people per square mile of land area.

Race and Age: In 1990, there were 2,414,178 white and 1,072,525 black and other persons residing in South Carolina. The 2000 census count, modified by race*, recorded a 13.9 increase in white population and a 17.7 percent increase in the black and other population. In South Carolina, blacks make up 95.8 percent of the black and other population. As shown below, of the ten years population change from 1990 to 2000, the 45-54 years age group showed the greatest percentage increase. Only four age groups, under 1, 15-19, 20-24 and 25-34 showed a decrease in population from 1990 to 2000. The age distribution and the percent change in the number of residents from 1990 to 2000 are as follows:

Table B-1.
Percent of Population by Age Group
South Carolina 1990 and 2000

Age Groups	1990		2000		Percent Change 1990-2000
	Total	Percent	Total	Percent

FERTILITY PATTERNS

Though the crude birth rate relates the event of birth to the entire population, it does not measure the population exposed to the chance of having a birth since it is based on both sexes in the population. However, the crude birth rate is an index to the relative speed at which additions are being made to a population through childbirth. When the event of birth is related to the population exposed at risk, that is, to females of the childbearing ages 15-44, a more specific rate is computed.

Table C-7.
Fertility Rates* by Race: South Carolina, 1987-2001
(Residence Data)

YEAR	TOTAL	WHITE	BLACK & OTHER
1987	63.8	58.4	74.3

GENDER RATIO

Out of the total 55,748 live births occurring to South Carolina residents in 2001, male births numbered 28,558 and female births numbered 27,190 giving a ratio of 105.0 males per 100 females. Table C-9 shows the ratio of males to females for the past five years.

Table C-9.
Gender Ratio of Males per 100 Females
South Carolina, 1997-2001
(Residence Data)

YEAR	TOTAL	WHITE	BLACK & OTHER
1997	107.8	108.6	106.5
1998	104.6	104.8	104.3
1999	104.1	104.6	103.2
2000	104.5	104.7	104.2
2001	105.0	106.1	103.2

MULTIPLE BIRTHS

During 2001, a total of 1,706 live births were multiple births. Of that number, 1,625 were twins (not sets), 73 were triplets (not sets), and 4 were quadruplets (not sets). The 1,706 multiple births resulted in a ratio of 1 multiple birth per 32.7 live births.

ATTENDANT AT BIRTH

Of the 55,748 resident births, physicians attended 95.1 percent. The term "physician" includes osteopaths, residents, interns and externs. Midwives attended 4.5 percent of the total births, 4.8 percent of the white births, and 4.0 percent of the black and other births. Other and unknown attendant accounted for less than one percent of the total births. The term "other" includes any specific attendant other than physician, midwife or self-attended, such as a friend or relative, EMT, RN, PA, etc. Included in the "unknown" category are not specified or not classifiable attendants.

AGE OF MOTHER

In 2001, there were 182 live births to resident mothers under 15 years of age and 32 live births to resident mothers 45 years of age and over. As shown in Table C-18, women aged 15-44 years were responsible for 99.6 percent of all live births. In 1980, the median age of mothers was 23.8 years. In 1986, the median age increased to 25 and remained there until 1997. The median age rose to 26 in 1997 and remained unchanged until 2001, when it rose to 27. The youngest resident mother to give birth in 2001 was 12 years old and the eldest was 51 years old.

LIVE BIRTHS TO UNMARRIED MOTHERS

In 2001, there were 14,775 live births to resident unmarried mothers in South Carolina, representing 26.5 percent of all live births. As in the past, live births to unmarried mothers occurred more frequently among young mothers. As shown in Table C-21, females under age 20 accounted for 30.8 percent of all live births to unmarried mothers in 2001.

LIVE BIRTHS BY BIRTHWEIGHT

Birthweight distribution by race reveals racial differences. For both races the highest segment of births weighed 3,000-3,499 grams, but the median birthweight for whites was greater than the median birthweight for black and other. Figure C-5 illustrates the birthweight distribution by race.

Table C-24.
Live Births by Birthweight Groups by Race of Mother:
South Carolina, 2001
(Residence Data)

Weight Group	Total		White		Black & Other	
	Number	Percent	Number	Percent	Number	Percent
Total	55,748 *	100.0	35,731	100.0	20,008	100.0
Less Than 2,500 grams	5,349	9.6	2,606	7.3	2,743	13.7
Under 500 grams	118	0.2	33	0.1	85	0.4
500-999 grams	406	0.7	163	0.5	243	1.2
1,000-1,499 grams	532	1.0	242	0.7	290	1.4
1,500-1,999 grams	1,057	1.9	512	1.4	545	2.7
2,000-2,499 grams	3,236	5.8	1,656	4.6	1,580	7.9
2,500 or More grams	50,392 *	90.4	33,125	92.7	17,265	86.3
Unknown Weight	7	0.0	3	0.0	-	0

* Includes unknown race

LOW WEIGHT LIVE BIRTHS

Live births under 5 pounds 8 ounces or less than 2,500 grams are characterized as low weight live births. Low weight live births accounted for 9.6 percent of the 55,748 resident births in 2001. In relation to age of mother, low weight births were comparatively frequent among very young mothers; 11.4 percent of all live births to mothers 15-19 were low weight. Only 8.5 percent of all live births to mothers 25-34 were low weight.

¹ Estimated pregnancies equal total live births plus abortions plus fetal deaths.

² Estimated pregnancies, Live Births and Abortions: Rates calculated per 1,000 population

³ Fetal Deaths: Rates calculated per 1,000 deliveries

⁴ Live Births to Unmarried Mothers: Percentage represents percent of all live births to unmarried females age 10-19

* Includes unknown race

¹ Estimated pregnancies equal total live births plus abortions plus fetal deaths.

² Estimated pregnancies, Live Births and Abortions: Rates calculated per 1,000 population

³ Fetal Deaths: Rates calculated per 1,000 deliveries

⁴ Live Births to Unmarried Mothers: Percentage represents percent of all live births to unmarried females age 10-19

¹Classified and Coded According to ICD-10

MULTIPLE CAUSES OF DEATH

Table G-22 presents information concerning the number of times certain causes of death are mentioned on death certificates compared to the number of times they are selected as the underlying cause of death. The third column of the table shows the ratio of the number of times mentioned to the number of times selected as the underlying cause. A ratio of 1.0 means that cause of death is usually selected as the underlying cause of death each time that it is mentioned on the death certificate. A large ratio indicates that a cause is usually not selected as the underlying cause of death when it is mentioned on the death certificate. An example of this is Anemia with a ratio of 7.5. In 2001, it was mentioned on 704 death certificates but only selected as the underlying cause on 94 of those certificates. This would indicate that Anemia is a contributing factor to approximately 7.5 times as many deaths as it is the actual underlying cause of death.

Examples of causes of death with ratios of 1.0 (or close to 1.0) include HIV, Malignant Neoplasms (Cancer) of the Stomach and Lung, Motor Vehicle Accidents, Accidental Drownings, Suicides, and Homicides.

Due to coding rule changes, beginning with the Tenth Revision of the ICD (1999 deaths), it is possible for a cause of death to be selected as the underlying cause of death even though it is not mentioned on the death certificate. This is due to the fact that some conditions mentioned on the certificate can be used to modify other conditions. For example, "History of Alcohol Abuse" can be listed on the certificate and then used to modify "Liver Disease" to make it "Alcoholic Liver Disease". Conditions such as these are reflected in ratios of less than 1.0. These are rare occurrences as shown in Table G-22. Only Hypertensive Heart Disease, Hypertensive Heart & Renal Disease, Alcoholic Liver Disease fall into that category in 2001.

Caution should be used in interpreting cause of death information based only on the underlying cause of death.

** SEE APPENDIX FOR ICD-10 CODES

YEARS OF POTENTIAL LIFE LOST (YPLL)

Years of Potential Life Lost (YPLL) is a commonly used method of measuring the rate of premature death. YPLL is defined as the number of years of potential life lost by each death occurring before a predetermined end point. The YPLL rate weights each death according to the number of years of life lost prior to the selected end point. Deaths occurring at younger ages are weighted more heavily than those occurring at older ages.

The number and rate of years of potential life lost before age 65 and before age 75 is presented for South Carolina residents during 2001 for all causes of death and for selected causes of death in Table G-23. This information is also presented for whites and for black and others in Table G-23A.

In 2001, South Carolinians lost 197,412 years of potential life before age 65 and 335,646 years before age 75 as shown in Table G-23. Corresponding YPLL rates are 5,528 years of potential life lost before age 65 per 100,000 population less than 65 years. YPLL rates for black and others are higher than those of whites for the 65 year end point (7,424 versus 4,607) and for the 75 year end point (11,299 versus 7,526).

Prior to age 65, accidental death was the leading cause of years of potential life lost (45,616 years) for all races and accounted for approximately 23 percent of the total number of years of life lost. Malignant neoplasms (31,116 years), diseases of the heart (28,425) and perinatal period conditions (117,407 years) ranked second, third and fourth, respectively. The findings observed prior to age 75 have malignant neoplasms (70,579 years) being the leading cause of years of potential life lost followed by diseases of the heart (60,555 years), accidental deaths (61,339 years), and perinatal period conditions (20,087 years).

MARRIAGE / DIVORCE

TRENDS IN MARRIAGES AND DIVORCES

During the twenty-five year period from 1977-2001, marriages in South Carolina have shown considerable fluctuation. As seen in Figure H-1. in 1979 the marriage rate reached a high of 18.2 and in 2001 an all time low of 9.9. Conversely the divorce rate, as shown in Figure H-1, increased from 3.7 in 1976 to its pinnacle in 1979 of 4.7. In 2001, the divorce rate was 3.6 and the marriage rate 9.9.

Figure H-1
Marriage and Divorce Rates
South Carolina, 1977-2001

MARRIAGES

For the calendar year 2001, there were 1,966 interracial marriages in South Carolina, with 1,033 of these being between whites and blacks. Of these 1,033, 67.0 percent involved black males and white females. Table H-1 shows a cross-classification of marriages by race of bride and race of groom for South Carolina, 2001. Figure H-2 illustrates how marriage rates by race have fluctuated over the last twenty-five years.

* includes Hawaiian, Filipino, other Asian and Pacific Islander and other Non-White

As displayed in Table H-3, there were 4,541 persons under the age of twenty who married in South Carolina in 2001. Therefore, teenagers represent 11.3 percent of all persons who married in this state in 2001. As in previous years, the greatest number of marriages occurred between brides and grooms within the 20-24 age group.

As shown in Table H-7, for 27,756 marriages (69.2%), both the bride and groom were residents of South Carolina. There were 1,204 marriages (3.0%) between resident brides and non-resident grooms, and 771 (1.9%) between non-resident brides and resident grooms. There were 10,397 (25.9%) marriages performed in South Carolina where both bride and groom were non-residents.

DIVORCES AND ANNULMENTS

Table H-8 shows that out of the total 29,314 persons in 2001 who were granted divorces, 32.1 percent were between the ages of 25 and 34.

The white divorce rate has consistently exceeded that of the black and other rate since 1962, the year divorces were first required to be registered with the Office of Public Health Statistics and Information Services. Figure H-3 illustrates the twenty-five year trend in divorces by race.

The most frequently cited grounds for divorce were one year separation, which accounted for 83.7 percent of all grounds for divorces, followed by adultery, drunkenness, and physical cruelty. Table H-11 shows divorces by legal grounds of decree. As shown in Table H-12, there were 11,712 children involved in divorces and annulments in 2001.

TECHNICAL NOTES

REGISTRATION OF VITAL EVENTS

The vital statistics system in South Carolina is a local-state-national reporting system where the vital event reports are initially submitted to the County Registrar located in the county where the event occurred. The reports are then submitted to the Division of Vital Records (State Office). By law, the Commissioner of Health is the State Registrar and appoints the chief administrative officer of each county health department as the County Registrar. The County Registrar appoints a Deputy County Registrar who carries out the routine functions of registration and certification of vital records at the county level. The State Office performs quality assurance testing on the records and also provides certifications of records for the general public. This office also provides data to the National Center for Health Statistics in cooperation with other states in order to produce national information on vital statistics.

Statewide legislation requiring the registration of births and deaths became effective January 1, 1915. South Carolina was admitted into the National Death Registration Area in 1916 and in the National Birth Registration Area in 1919. After failing to meet the completeness of registration tests, the state was excluded from both in 1925. On the basis of later tests, South Carolina was readmitted into the National Birth and Death Registration Areas in 1928.

Marriage records have been filed with the South Carolina Department of Health and Environmental Control since July 1950. The reporting form prevented the state from being admitted as a Marriage Registration Area (MRA) in the national system until legislation was enacted in 1970 to standardize the reporting form which enabled the state to be admitted as a MRA in 1971.

Reports of divorces and annulments have been filed with the South Carolina Department of Health and Environmental Control since July 1962. The reporting of these events reached 90 percent completeness in 1971, which enabled the state to qualify as a Divorce Registration Area.

No thorough study of the completeness of fetal death registration in South Carolina has yet been made. While the law requires that the death of any fetus that has advanced beyond the 20th week of gestation or weighs 350 grams or more to be registered, it is believed that registration is notably incomplete. The registration of fetal deaths will continue to improve as the need for these data are shown through health research.

Records received after the closing date of the statistical file are not included in this report. Frequency counts in this report are based on 2001 events processed in the state office before May 31, 2002. As this publication goes to press, 6 births, 31 deaths, 0 abortion, 0 marriage and 0 divorce records for 2001 were processed after the closing date and were not added to the statistical file for 2001.

REVISION OF CERTIFICATES

The Office of Public Health Statistics and Information Services revised its certificates of birth, death, fetal death and induced termination of pregnancy in January 1989, based on standards set forth by the National Center for Health Statistics.

The 1989 revised vital records forms were major departures from the previous revisions (see appendix). While many of the items needed for legal purposes (e.g., name) remained unchanged or slightly modified, there were major and significant changes in the Confidential Information for Medical and Health Use section of the Certificate of Live Birth. Most of the changes represented efforts to clarify items for more complete and accurate data reporting. Other than the increased length of the revised forms, the most obvious change on the Certificate of Live Birth and Report of Fetal Death is the replacement of the open-ended medical items with items having a checkbox format. The concept of checkboxes as a mechanism for capturing information on medical factors is not new. In fact, this format was successfully implemented in several states with the previous revision of the forms. Additionally, the lists of risk factors, complications of labor and/or delivery and abnormal conditions of the newborn are taken from the Hollister Maternal/Newborn Record System, which is widely used in many obstetric offices.

The revisions on the Fetal Death Report, like the Certificate of Live Birth, largely pertain to the medical conditions of the mother, labor/delivery and condition of the fetus. The data on these variables are not reported in this publication, since the quality of these variables has not been assessed to assure the accuracy of the data.

The Certificate of Death has remained essentially the same for many years. However, the 1989 revision of the form was an attempt to improve the accuracy of the data reported in the medical certification section of the certificate by including instructions for completing the medical certification on the front of the certificate and, in more detail, on the back. Additionally, the revised certificate allows a physician to pronounce and certify only to the time and place of death in cases where the attending physician is unavailable and the death is clearly not a medical-legal case. The funeral director can then contact the attending physician to obtain the medical certification at a later time. This revision allows funeral directors the ability to file death certificates in a more timely manner, as well as improve the quality and completeness.

The 1989 revisions to the vital records forms were intended to make the vital statistics system more responsive to public health concerns for high quality data.

ALLOCATION OF EVENTS BY RESIDENCE OR OCCURRENCE

With respect to geographic allocation of vital events, the data may be compiled either by place of residence or by place of occurrence.

RESIDENCE DATA are allocated to the place in South Carolina where the person normally resided, regardless of where the event occurred. A cooperative system of interstate exchange of transcripts of birth and death records permits events occurring to South Carolina residents in other states to be included in the South Carolina resident tabulations. In these tabulations, births are allocated to the county of the mother's residence and deaths are allocated to the county of residence of the deceased. Since there is no interstate exchange of transcripts of marriage and divorce records, these statistics are limited to those events, which occurred in South Carolina.

OCCURRENCE DATA are allocated to the place in South Carolina where the event occurred, regardless of the usual residence of the person involved. Both residence and occurrence data are useful for different purposes. Occurrence data represent the requirements for hospitals and other health facilities. These types of data may help to determine such needs as maternity services, intensive care facilities for newborn babies, or emergency room facilities. Residence data are more properly utilized in measuring the fertility and the incidence of death in the population living in an area.

PLACE OF RESIDENCE OR OCCURRENCE 2001

	BIRTHS			DEATHS		
	TOTAL	WHITE	BLACK & OTHER	TOTAL	WHITE	BLACK & OTHER
Occurring in S.C.	53,255	33,802	19,453	35,817	25,289	10,528
Residents of S.C.	52,686	33,386	19,300	34,900	24,551	10,349

In South Carolina	52,686	33,386	19,300	34,900	24,551	10,349
Out- of- State	3,062*	345	708	1,676	1,230	433

* Includes unknown races

Note: Events to South Carolina residents on military status outside of the United States are not reflected in these tabulations.

DEFINITIONS OF TERMS

ABORTION: Purposeful termination of pregnancy with intention other than to produce a liveborn infant or to remove a dead fetus.

FETAL DEATH: Death prior to the complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy; the death is indicated by the fact that after such expulsion or extraction, the fetus does not breathe or show any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles. (Definition recommended by World Health Organization in 1950). A fetal death is required to be reported if the fetus has completed or passed the twentieth week of gestation or weighs 350 grams or more. (Weight criteria effective in 1978). Vital Statistics Laws and Regulations 61-19: Vital Statistics, Section 21(a). **Heartbeats are to be distinguished from transient cardiac contractions; respirations are to be distinguished from fleeting respiratory efforts or gasps.**

INFANT DEATH: Death of a live born infant under one year of age.

LIVE BIRTH: The complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy, which, after such expulsion or extraction, breathes or shows any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached. (Definition recommended by World Health Organization in 1950). **Heartbeats are to be distinguished from transient cardiac contractions; respirations are to be distinguished from fleeting respiratory efforts or gasps.**

VERY LOW BIRTH WEIGHT: Very low birth weight is a weight at birth which is less than 1,500 grams (3 pounds, 4 ounces), regardless of the period of gestation.

LOW BIRTH WEIGHT: Low birth weight is a weight at birth which is less than 2,500 grams (5 pounds, 8 ounces), regardless of the period of gestation.

MARITAL STATUS ON BIRTH CERTIFICATE:

Unmarried - a birth which occurs to a woman who has never been married or who has been widowed or legally divorced from her husband in excess of 280 days.

Married - a birth, which occurs to a woman who has been married or was married within 280 days from conception.

Paternity acknowledgment - gives authorization to list the name of the father on the birth certificate of a child born to an unmarried mother with written consent of the father and mother by means of an affidavit as required by South Carolina Law, Section 44-63-165. For statistical purposes, paternity acknowledgments are included in the "married " category.

MATERNAL DEATH: Death of a woman whose cause of death is assigned to Complications of Pregnancy, Childbirth, and Puerperium (Tenth Revision ICD O00-O99). If death occurred more than 42 days after termination of pregnancy, the death is not considered to be pregnancy-related and is not assigned to codes O00-O99.

MULTIPLE CAUSES OF DEATH: A system of coding all of the medical entities reported on the death certificate.

NATURAL INCREASE: The increase in the population due to an excess of births over deaths for a particular period.

NEONATAL DEATH: Death of a live born infant under 28 days of age.

OCCURRENCE DATA: Data allocated to the place in South Carolina where the event occurred, regardless of the usual residence of the person involved.

PERINATAL DEATH: Death occurring during the perinatal period (i.e. to a live born infant less than 28 days of age or a fetus that has passed the twentieth week of gestation or weighs 350 grams or more).

POSTNEONATAL DEATH: Death of a live born infant 28-364 days of age.

RESIDENCE DATA: Data allocated to the place in South Carolina where the person normally resided, regardless of where the event occurred.

UNDERLYING CAUSE OF DEATH: The disease or injury that initiated the train of morbid events leading directly to death. (International Classification of Disease).

YEARS OF POTENTIAL LIFE LOST (YPLL): YPLL is defined as the number of years of potential life lost by each death occurring before a predetermined end point, usually age 65 or age 75. YPLL rates are per 100,000 population who are younger than the age of the end point.

INTERPRETATION OF DATA

RACE: Information on race of the mother and father is reported on birth and fetal death certificates, and the race of the decedent is reported on death certificates. Fetal deaths are reported by race of mother. As of 1990, Live Births are reported by race of mother instead of race of child. This change allows South Carolina's birth data to be consistent with the National Center for Health Statistics and other states throughout the United States. The race on the reported marriages where the license was issued in South Carolina is by the race of groom and on divorces and annulments granted in South Carolina is by the race of husband. For statistical purposes, the tables in this report are based on the broad classifications of "white" and "black and other". Blacks make up 95.8 percent of the black and other population of South Carolina.

PATERNITY ACKNOWLEDGMENT: For statistical purposes, paternity acknowledgments are included in the married category. In 2000 there were 6,259 paternity acknowledgments representing 11.2 percent of the total resident live births and 19.0 percent of all live births to married women in South Carolina.

COMPARABILITY: In order that disease classifications may be consistent with advances in medical science and changes in diagnostic practice, any system for categorizing causes of death must periodically be revised. Major revisions in the International Classification of Diseases (ICD), by which causes of death are classified, occur approximately every ten years, and each decennial revision of the ICD has produced some break in comparability of cause of death statistics. In South Carolina, the Sixth Revision of the ICD was used from 1949-1957; the Seventh Revision for 1958-1968; the Eighth 1969-1978; and the Ninth Revision went 1979-1998; and the Tenth Revision went into effect in 1999.

Prior to 1949, under the first five revisions, cause of death was selected on the basis of priority tables for multiple causes, as set forth in The Manual For Joint Causes of Death. Under the Sixth, Seventh, Eighth, and Ninth Revisions of the International Lists, the cause selected for tabulation has been the "underlying" cause, defined as the "disease or injury which initiated the train of morbid events, leading directly to death." (ICDA, Eighth Revision, 1968, Vol. 1, page xxix).

The introduction of the concept of "underlying" cause in 1949, with the Sixth Revision, resulted in a basic change in classification of death which seriously affects the interpretation of mortality trends before and after 1949. The Seventh Revision was essentially a clarification of the Sixth Revision, but the Eighth Revision introduced some major modifications in classification lists and coding procedures. The Ninth Revision also brought some major changes in classification and coding. However, the Tenth Revision introduced some of the most dramatic changes so far.

In order to make valid comparisons of mortality by cause for events classified by different revisions of the ICD, comparability ratios were developed. Comparability ratios are computed by the National Center for Health Statistics from the results of dual coding of certificates according to the old and the new procedures. Taking the number of deaths classified to a given cause by the Tenth Revision and dividing the result by the number of deaths classified to that cause by the Eighth Revision derived the comparability ratios used with the Tenth Revision. Provisional comparability ratios for the United States as a whole, based on the Ninth and Tenth Revisions, have been developed for a limited number of causes published by the National Center for Health Statistics. Tables are included in the Appendix portion of this report.

RATE CALCULATIONS WITH SMALL NUMBERS: There are variations in all statistics that are the result of chance. This characteristic is of particular importance in classifications with small numbers of events where small variations are proportionately large in relation to the base figure. As an example, small changes in the number of deaths or births in small population areas or in the number of deaths from uncommon causes could result in large changes in these crude rates. For this reason, rates for counties with small populations or other small bases should be used cautiously. In this report, rates are not calculated for places of less than 2,500 population or when the number of events is less than 3 for a particular category, due to the known instability of rates based on small numbers. In the Perinatal Section, 3-year rates are calculated to provide a more stable base for comparison of trends over time.

MEDICAL CERTIFICATION OF DEATH: Only a person authorized by law, usually a physician or a coroner, can make the medical certification of death. Thus, the reliability and accuracy of cause-of-death statistics are, to a large extent, governed by the acumen and ability of the doctor or coroner to make the proper diagnosis and by the care with which the death certificate is completed. It is recognized that death may not result from a single morbid condition. Since 1980, South Carolina medical certifiers have been asked to provide contributing conditions adding to the underlying cause of death information. Nineteen hundred eighty-eight is the first year that multiple cause information was included in this report.

MULTIPLE CAUSE OF DEATH: Cause of death statistics have, for many years, been based only on the underlying cause of death, the single disease or injury that initiated the train of events leading to death or the circumstances of the accident that produced the fatal injury. The underlying cause is selected by a computerized algorithm called the Automated Classification of Medical Entities (ACME) from the ordering of conditions reported by physicians or coroners on the death certificate. Analysis of the underlying cause of death information allows for simplified, consistent reporting of data and provides a means of evaluating the impact of public health initiatives. When more than one cause is reported on the certificate, however, the tabulation of only one cause for mortality statistics may lead to a loss of information on any condition that is an element in the death but that is not selected as the underlying cause of death. Cause-of-death statistics are usually based on the underlying cause of death, a single disease or injury circumstance that initiated the sequence of events leading to death. In this system, each death is assigned one underlying cause of death. However, death certificates provide for the inclusion of more information than the underlying cause of death alone. The immediate cause of death, antecedent causes giving rise to the immediate cause and the medical certifier also may enter other significant conditions contributing to the death. These data provide a way of estimating the impact of significant co-factors contributing to a death and offer a means of utilizing information on causes, such as hypertension, asthma, bronchitis, and diabetes, that are frequently present at death but that are usually not lethal by themselves. Each death is assigned one underlying cause and up to nineteen contributing causes of death.

CLASSIFICATION AND METHODOLOGY IN DETERMINING LEADING CAUSES OF INFANT DEATH:

The leading causes of infant mortality in this report are based on the National Center for Health Statistics (NCHS) list of 130 selected causes of infant mortality. The same methodology used by NCHS to rank the causes of infant death has also been adopted for this report. This change represents an attempt to standardize reporting of South Carolina data to the national model. The broad categories of cause of death used in determining the leading causes of infant death have been subdivided into more specific categories. This change in methodology makes the leading causes of infant death tables in this report not comparable to similar tables in the reports of years prior to 1998.

YEARS OF POTENTIAL LIFE LOST RATES: Years of Potential Life Lost (YPLL) is a commonly used method of measuring the rate of premature death. YPLL rates identify untimely deaths in a way the traditional mortality rate can not. YPLL is defined as the number of years of potential life lost by each death occurring before a predetermined end point. Ages 65 and 75 are often selected as end points, since age 65 approximates the usual retirement age and 75 years, the average life expectancy. The YPLL rate weights each death according to the number of years of life lost prior to the selected end point. Deaths occurring at younger ages are weighted more heavily than those occurring at older ages. To calculate the number of years of potential life lost, the age at last birthday of each death is subtracted from the selected end point. For this publication, these values are summed for all deaths and by selected cause of death for all races and by race group. Only deaths occurring at ages younger than the end point are included. YPLL rates are per 100,000 population who are younger than the age of the end point.

POPULATION DATA: The estimated total number of people residing in the state and in each county for 2001 was provided by the Office of Research and Statistics, South Carolina State Budget and Control Board from data released by the Census Bureau. These population estimates, however were not available by race, gender or age category, which are required for some of the rates in this publication. In order to provide 2001 population estimates for these categories, the staff of ORS, SCSB7CB and the staff of the Division of Biostatistics and Health GIS, Public Health Statistics and Information Services, SCDHEC jointly developed a two-step methodology consisting of firstly, determining, for each county, the proportional distribution of the 2000 population by race, gender and age category and secondly, applying the distribution of each county, which was determined in step one, to the corresponding 2001 population

estimate, which was available from ORS, SCB&CB, The county data were summed by category to provide population estimates by race, gender and age category for the state.

POPULATION DATA BY RACE: At the time of this publication, population files released by the U.S. Census Bureau contain data for a "multiple race" category and for single race categories (including an "other/non-Census designated race" category). This presents problems for vital rates from two standpoints: first, these population files contain counts of persons with more than one race and therefore are not compatible with vital statistics numerators which contain information for persons by single race category, second, the population files contain the "other/non-Census designated race" category which is not used to calculate vital statistics rates.

In order to provide rates by single race category of 'white' and 'black and other' for South Carolina vital events, a methodology was developed that would regroup the populations of the race categories, 'multiple race' and 'other/non-Census designated race', into standard single race categories. This methodology was developed jointly by the staff of the Office of Research and Statistics, South Carolina State Budget and Control Board and the staff of the Division of Biostatistics, Public Health Statistics and Information Services, SCDHEC. At the time of this publication, neither modified or bridged files had been issued by the US Bureau of the Census.

Of the 4,012,012 South Carolinians counted in the 2000 Census, approximately one percent (39,950) were included in the 'multiple' race category and another one percent (39,926), in the 'other/non-Census designated race' category. The populations of these two race categories were allocated to the standard single race categories by age, gender and county. This allocation was based on the proportional distribution of the population of the standard single race categories within each of these age, gender, county groups.

POPULATION DATA FOR SELECTED AGE GROUPS: For inter-census years, ORS provides estimated population data for South Carolina by age for five-year age groups. It is assumed that the population within each of these age categories is distributed uniformly through out the age interval. Based on this assumption, the population for females 14-17, 15-17 and 18-19 years is derived, consecutively, as follows – (20% of the female population 10-14 years plus 60% of the female population 15-19 years), (60% of the female population 15-19), and (40% of the female population 15-19). Pregnancy data for these teenagers are published annually in the South Carolina Vital and Morbidity Statistics reports and also in the South Carolina Teen Pregnancy Data Book(s).

Implementation of the International Classification of Diseases (ICD)10th Revision

The ICD is a classification system developed collaboratively between the World Health Organization (WHO) and 10 international centers so that the medical terms reported by physicians, medical examiners, and coroners on death certificates can be grouped together for statistical purposes. ICD-10 replaces the ICD-9, used with 1979-1998 data.

The purpose of the ICD and of WHO sponsorship is to promote international comparability in the collection, classification, processing and presentation of mortality statistics. New revisions of the ICD are implemented periodically so that the classification reflects advances in medical science.

ICD-10 affects the classification, processing, and presentation of mortality data. Some titles have changed. The total number of categories has doubled as a result of the addition or deletion of terms used to describe diseases or conditions. The transfer of certain diseases from one section to another reflects new discoveries and advances in knowledge on the nature or causes of particular diseases. The addition of separate categories identifies specific diseases or particular complications of diseases that are of growing interest. Additionally, the codes associated with each title have been converted from numeric to alphanumeric entities. The ICD rules for processing mortality data are generally similar but account for some changes observed in mortality statistics.

HOW ICD-10 COMPARES TO ICD-9

The intent of developing new revisions is to incorporate changes in medical knowledge. Compared with ICD-9, the ICD-10 has:

- expanded detail for many conditions (e.g., viral hepatitis has been expanded from ICD-9 code 070, a single 3-digit category, to ICD-10 codes B15-B19, five 3-digit categories)
- transferred conditions around the classification (e.g., hemorrhage has been moved from the circulatory chapter to the symptoms and signs chapter)
- used alphanumeric codes instead of numeric codes (e.g., code for diabetes mellitus was 250 in ICD-9 and is E10-E14 in ICD-10)
- modified coding rules (e.g., the "Old pneumonia, influenza, and maternal conditions" and "Error and accidents in medical care" coding rules have been eliminated)
- modified the tabulations lists (e.g., the US' ICD-10 113-cause list replaces the US' ICD-9 72-cause list)

Assistance in using the ICD-10 can be obtained by contacting the National Center for Health Statistics, Data Dissemination Branch, 6525 Belcrest Road, Room 1064 Hyattsville, Maryland 20782-2003

(301) 458-4636 (voice) (301) 458-4027 (fax)

National Center for Health Statistics (NCHS) Web site at: www.cdc.gov/nchs/

Vital statistics data provide better measures of health status when they are related to the size of the population and particularly to the age and sex components of the population. These relationships are usually expressed in terms of rates or percentages. During intercensal years, the validity of vital statistics rates depends upon the accuracy of population estimates.

For the most part, rates presented in this report are crude rates, i.e., the number of events per 1,000 total population. Crude rates are limited for purposes of making comparisons among geographic areas and for changes over time because they ignore characteristics of the population, such as age and sex. Age-adjusted rates or further analyses may be necessary in order to make valid comparisons.

Rates used in this report are calculated as follows:

Cause of Death Rate	= $\frac{\text{Annual number of deaths from a stated cause}}{\text{Population of area}}$	X 100,000
Death Rate (crude)	= $\frac{\text{Annual number of deaths}}{\text{Population of area}}$	X 1,000
Divorce Rate (crude)	= $\frac{\text{Annual number of divorces}}{\text{Population of area}}$	X 1,000
Fetal Mortality Rate	= $\frac{\text{Annual number of fetal deaths}}{\text{Annual number of live births} + \text{Annual number of fetal deaths}}$	X 1,000
General Fertility Rate	= $\frac{\text{Annual number of live births}}{\text{Population of women 15-44 years of age}}$	X 1,000
Birth Rate of Unmarried Mothers	= $\frac{\text{Annual number of unmarried mothers}}{\text{Annual number of live births}}$	X 1,000
Infant Mortality Rate	= $\frac{\text{Annual number of infant deaths}}{\text{Annual number of live births}}$	X 1,000
Live Birth Rate (Crude)	= $\frac{\text{Annual number of live births}}{\text{Population of area}}$	X 1,000
Marriage Rate (Crude)	= $\frac{\text{Annual number of marriages}}{\text{Population of area}}$	X 1,000
Maternal Mortality Rate	= $\frac{\text{Annual number of maternal deaths}}{\text{Annual number of live births}}$	X 10,000
Neonatal Mortality Rate	= $\frac{\text{Annual number of neonatal deaths}}{\text{Annual number live births}}$	X 1,000
Postneonatal Mortality Rate	= $\frac{\text{Annual number of postneonatal deaths}}{\text{Annual number of live births}}$	X 1,000
Perinatal Mortality Rate	= $\frac{\text{Annual number of fetal deaths} + \text{Annual number of neonatal deaths}}{\text{Annual number of live births} + \text{Annual number of fetal deaths}}$	X 1,000
Low Weight Birth Rate	= $\frac{\text{Annual number of live births weighing less than 2500 grams}}{\text{Annual number of live births}}$	X 1,000

Grams Weight Conversion Chart

500 grams or less	=	1lb. 1 oz. or less
501 - 1,000 grams	=	1 lb. 2 oz. - 2 lb. 3 oz.
1,001 - 1,500 grams	=	2 lb. 4 oz. - 3 lb. 4 oz.
1,501 - 2,000 grams	=	3 lb. 5 oz. - 4 lb. 6 oz.
2,001 - 2,500 grams	=	4 lb. 7 oz. - 5 lb. 8 oz.
2,501 - 3,000 grams	=	5 lb. 9 oz. - 6 lb. 9 oz.
3,000 - 3,500 grams	=	6 lb. 10 oz. - 7 lb. 11 oz.
3,501 - 4,000 grams	=	7 lb. 12 oz. - 8 lb. 13 oz.
4,001 - 4,500 grams	=	8 lb. 14 oz. - 9 lb. 14 oz.
4,501 - 5,000 grams	=	9 lb. 15 oz. - 11 lb. 0 oz.
5,001 grams or more	=	11 lb. 1 oz. - or more

LIST OF 113 SELECTED CAUSES OF DEATH

Number	Cause of death
	All causes.....
1#	Salmonella infections..... A01- A02
2#	Shigellosis and amebiasis..... A03, A06
3	Certain other intestinal infections..... A04, A07- A09
#	Tuberculosis..... A16- A19
4	Respiratory tuberculosis..... A16
5	Other tuberculosis..... A17- A19
6#	Whooping cough..... A37
7#	Scarlet fever and erysipelas..... A38, A46
8#	Meningococcal infection..... A39
9#	Septicemia..... A40- A41
10#	Syphilis..... A50- A53
11#	Acute poliomyelitis..... A80
12#	Arthropod-borne viral encephalitis..... A83- A84, A85. 2
13#	Measles..... B05
14#	Viral hepatitis..... B15- B19
15#	Human immunodeficiency virus (HIV) disease..... B20- B24
16#	Malaria..... B50- B54
17	Other and unspecified infectious and parasitic diseases and their sequelae A00, A05, A20- A36, A42- A44, A48- A49, A54- A79, A81- A82, A85. 0- A85. 1, A85. 8, A86- B04, B06- B09, B25- B49, B55- B99
#	Malignant neoplasms..... C00- C97
18	Malignant neoplasms of lip, oral cavity and pharynx..... C00- C14
19	Malignant neoplasm of esophagus..... C15
20	Malignant neoplasm of stomach..... C16
21	Malignant neoplasms of colon, rectum and anus..... C18- C21
22	Malignant neoplasms of liver and intrahepatic bile ducts..... C22
23	Malignant neoplasm of pancreas..... C25
24	Malignant neoplasm of larynx..... C32
25	Malignant neoplasms of trachea, bronchus and lung..... C33- C34
26	Malignant melanoma of skin..... C43
27	Malignant neoplasm of breast..... C50
28	Malignant neoplasm of cervix uteri..... C53
29	Malignant neoplasms of corpus uteri and uterus, part unspecified..... C54- C55
30	Malignant neoplasm of ovary..... C56
31	Malignant neoplasm of prostate..... C61
32	Malignant neoplasms of kidney and renal pelvis..... C64- C65
33	Malignant neoplasm of bladder..... C67
34	Malignant neoplasms of meninges, brain and other parts of central nervous system..... C70- C72
	Malignant neoplasms of lymphoid, hematopoietic and related tissue..... C81- C96
35	Hodgkin's disease..... C81
36	Non-Hodgkin's lymphoma..... C82- C85
37	Leukemia..... C91- C95
38	Multiple myeloma and immunoproliferative neoplasms..... C88, C90
39	Other and unspecified malignant neoplasms of lymphoid, hematopoietic and related tissue..... C96
40	All other and unspecified malignant neoplasms..... C17, C23- C24, C26- C31, C37- C41, C44- C49, C51- C52, C57- C60, C62- C63, C66, C68- C69, C73- C80, C97
41#	In situ neoplasms, benign neoplasms and neoplasms of uncertain or unknown behavior..... D00- D48
42#	Anemias..... D50- D64
43#	Diabetes mellitus..... E10- E14
#	Nutritional deficiencies..... E40- E64
44	Malnutrition..... E40- E46
45	Other nutritional deficiencies..... E50- E64
46#	Meningitis..... G00, G03
47#	Parkinson's disease..... G20- G21
48#	Alzheimer's disease..... G30
#	Major cardiovascular diseases..... I00- I78
	Diseases of heart..... I00- I09, I11, I13, I20- I51
49	Acute rheumatic fever and chronic rheumatic heart diseases..... I00- I09
50	Hypertensive heart disease..... I11

Number

51	Hypertensive heart and renal disease.....	I13
	Ischemic heart diseases.....	I20-I25
52	Acute myocardial infarction.....	I21-I22
53	Other acute ischemic heart diseases.....	I24
	Other forms of chronic ischemic heart disease.....	I20, I25
54	Atherosclerotic cardiovascular disease, so described.....	I25.0
55	All other forms of chronic ischemic heart disease.....	I20, I25.1-I25.9
	Other heart diseases.....	I26-I51
56	Acute and subacute endocarditis.....	I33
57	Diseases of pericardium and acute myocarditis.....	I30-I31, I40
58	Heart failure.....	I50
59	All other forms of heart disease.....	I26-I28, I34-I38, I42-I49, I51
60#	Essential (primary) hypertension and hypertensive renal disease.....	I10, I12
61#	Cerebrovascular diseases.....	I60-I69
62#	Atherosclerosis.....	I70
	Other diseases of circulatory system.....	I71-I78
63#	Aortic aneurysm and dissection.....	I71
64	Other diseases of arteries, arterioles and capillaries.....	I72-I78
65	Other disorders of circulatory system.....	I80-I99
#	Influenza and pneumonia.....	J10-J18
66	Influenza.....	J10-J11
67	Pneumonia.....	J12-J18
	Other acute lower respiratory infections.....	J20-J22
68#	Acute bronchitis and bronchiolitis.....	J20-J21
69	Unspecified acute lower respiratory infection.....	J22
#	Chronic lower respiratory diseases.....	J40-J47
70	Bronchitis, chronic and unspecified.....	J40-J42
71	Emphysema.....	J43
72	Asthma.....	J45-J46
73	Other chronic lower respiratory diseases.....	J44, J47
74#	Pneumoconioses and chemical effects.....	J60-J66, J68
75#	Pneumonitis due to solids and liquids.....	J69
76	Other diseases of respiratory system.....	J00-J06, J30-J39, J67, J70-J98
77#	Peptic ulcer.....	K25-K28
78#	Diseases of appendix.....	K35-K38
79#	Hernia.....	K40-K46
#	Chronic liver disease and cirrhosis.....	K70, K73-K74
80	Alcoholic liver disease.....	K70
81	Other chronic liver disease and cirrhosis.....	K73-K74
82#	Cholelithiasis and other disorders of gallbladder.....	K80-K82
#	Nephritis, nephrotic syndrome and nephrosis.....	N00-N07, N17-N19, N25-N27
83	Acute and rapidly progressive nephritic and nephrotic syndrome.....	N00-N01, N04
84	Chronic glomerulonephritis, nephritis and nephritis not specified as acute or chronic, and renal sclerosis unspecified.....	N02-N03, N05-N07, N26
85	Renal failure.....	N17-N19
86	Other disorders of kidney.....	N25, N27
87#	Infections of kidney.....	N10-N12, N13.6, N15.1
88#	Hyperplasia of prostate.....	N40
89#	Inflammatory diseases of female pelvic organs.....	N70-N76
#	Pregnancy, childbirth and the puerperium.....	000-099
90	Pregnancy with abortive outcome.....	000-007
91	Other complications of pregnancy, childbirth and the puerperium.....	010-099
92#	Certain conditions originating in the perinatal period.....	P00-P96
93#	Congenital malformations, deformations and chromosomal abnormalities.....	Q00-Q99
94	Symptoms, signs and abnormal clinical and laboratory findings, not elsewhere classified.....	R00-R99
95	All other diseases (Residual).....	D65-E07, E15-E34, E65-F99, G04-G12, G23-G25, G31-H93, K00-K22, K29-K31, K50-K66, K71-K72, K75-K76, K83-M99, N13.0-N13.5, N13.7-N13.9, N14, N15.0, N15.8-N15.9, N20-N23, N28-N39, N41-N64, N80-N98
#	Accidents.....	V01-X59, Y85-Y86
	Transport accidents.....	V01-V99, Y85
96	Motor vehicle accidents.....	V02-V04, V09.0, V09.2, V12-V14, V19.0-V19.2, V19.4-V19.6, V20-V79, V80.3-V80.5, V81.0-V81.1, V82.0-V82.1, V83-V86, V87.0-V87.8, V88.0-V88.8, V89.0-V89.2

LIST OF 113 SELECTED CAUSES OF DEATH-Con.

Number	Cause of death
97	Other land transport accidents..... V01, V05-V06, V09. 1, V09. 3-V09. 9, V10-V11, V15-V18, V19. 3, V19. 8-V19. 9, V80. 0-V80. 2, V80. 6-V80. 9, V81. 2-V81. 9, V82. 2-V82. 9, V87. 9, V88. 9, V89. 1, V89. 3, V89. 9
98	Water, air and space, and other and unspecified transport accidents and their sequelae V90-V99, Y85
	Nontransport accidents..... W00-X59, Y86
99	Falls..... W00-W19
100	Accidental discharge of firearms..... W32-W34
101	Accidental drowning and submersion..... W65-W74
102	Accidental exposure to smoke, fire and flames..... X00-X09
103	Accidental poisoning and exposure to noxious substances..... X40-X49
104	Other and unspecified nontransport accidents and their sequelae W20-W31, W35-W64, W75-W99, X10-X39, X50-X59, Y86
#	Intentional self-harm (suicide)..... X60-X84, Y87. 0
105	Intentional self-harm (suicide) by discharge of firearms..... X72-X74
106	Intentional self-harm (suicide) by other and unspecified means and their sequelae X60-X71, X75-X84, Y87. 0
#	Assault (homicide)..... X85-Y09, Y87. 1
107	Assault (homicide) by discharge of firearms..... X93-X95
108	Assault (homicide) by other and unspecified means and their sequelae..... X85-X92, X96-Y09, Y87. 1
109#	Legal intervention..... Y35, Y89. 0
	Events of undetermined intent..... Y10-Y34, Y87. 2, Y89. 9
110	Discharge of firearms, undetermined intent..... Y22-Y24
111	Other and unspecified events of undetermined intent and their sequelae Y10-Y21, Y25-Y34, Y87. 2, Y89. 9
112#	Operations of war and their sequelae..... Y36, Y89. 1
113#	Complications of medical and surgical care..... Y40-Y84, Y88

Estimated comparability ratios for 113 selected causes of death

List number	Cause of death ¹	Number of deaths allocated according to		Estimated comparability ratio	Standard error	Relative standard error	95 percent confidence limits

CERTIFICATE OF LIVE BIRTH

BIRTH NUMBER

1. CHILD'S NAME <i>First Middle Last</i>			2. DATE OF BIRTH (Month, Day, Year)		3. TIME OF BIRTH M		
4. SEX		5. CITY, TOWN, OR LOCATION OF BIRTH			6. COUNTY OF BIRTH		
7. PLACE OF BIRTH				8. FACILITY NAME (If not institution, give street and number)			
9. I certify that this child was born alive at the place and time and on the date stated.			10. SIGNED (Month, Day, Year)		11. REGISTRAR'S NAME AND TITLE (If not certified, give name/Print)		
12. CERTIFIER'S NAME AND TITLE			13. REGISTRAR'S NAME AND TITLE (If not certified, give name/Print)				
14. REGISTRAR'S SIGNATURE						15. DATE FILED BY REGISTRAR (Month, Day, Year)	
16a. MOTHER'S NAME <i>First Middle Last</i>			16b. MAIDEN SURNAME		17. DATE OF BIRTH (Month, Day, Year)		
18. BIRTHPLACE (State and Country)			19. RESIDENCE - STATE AND COUNTY		19c. CITY, TOWN, OR LOCATION		
19d. STREET AND NUMBER			20. ZIP CODE		20b. OTHER'S MAIL ADDRESS (different than residence)		
21. FATHER'S NAME <i>First Middle Last</i>			22. DATE OF BIRTH (Month, Day, Year)		23. BIRTHPLACE (State or Foreign Country)		
24. I certify that the information furnished on this certificate is true and correct to the best of my knowledge and belief.							
Signature of Parent							
CONFIDENTIAL INFORMATION FOR MEDICAL AND HEALTH USE ONLY							
25. OF HISPANIC ORIGIN?		26. RACE American Indian, Black, White, etc. (Specify below)		27. EDUCATION (Specify only highest grade completed)		28. SOCIAL SECURITY NUMBER (Specify below)	
25a. Mother		25b. Father		Elementary/Secondary (0-12) COLLEGE (1-4 or 5+)		28a. Mother	
						28b. Father	
29. PREGNANCY HISTORY (Complete each section)				30. MOTHER MARRIED? (At birth, conception, or any time between) (Yes or No)		31. DATE LAST NORMAL MENSTRUATION BEGAN (Month, Day, Year)	
LIVE BIRTHS (Do not include this child)		OTHER TERMINATIONS (Spontaneous and induced at any time after conception)		32. MONTH OF PREGNANCY PRENATAL CARE BEGAN - First, Second, Third, etc. (Specify)		33. PRENATAL VISITS - Total Number (Including physician, clinic, Health Department visits)	
29a. Now Living		29b. Now Dead		34. BIRTH WEIGHT (Specify unit)		35. CLINICAL ESTIMATE OF GESTATION (Weeks)	
Number _____		Number _____					
29c. DATE OF LAST LIVE BIRTH (Month/Year)		29d. DATE OF LAST OTHER TERMINATION (Month/Year)		36a. PLURALITY - Single, Twin, Triplet, etc. (Specify)		36b. IF NOT SINGLE BIRTH - Born First, Second, Third, etc. (Specify)	
37. APGAR SCORE		38a. MOTHER TRANSFERRED PRIOR TO DELIVERY? If Yes, enter name of facility transferred to:		39. WHAT PROPHYLACTIC USED IN EYES? (Specify)			
37a. 1 Minute		37b. 5 Minutes		38b. INFANT TRANSFERRED? If Yes, enter name of facility transferred to:			
				TIME USED M.			
40a. MEDICAL RISK FACTORS FOR THIS PREGNANCY		42. COMPLICATIONS OF LABOR AND/OR DELIVERY		45. CONGENITAL ANOMALIES OF CHILD			
40b. OTHER RISK FACTORS FOR THIS PREGNANCY		43. METHOD OF DELIVERY					
Tobacco use during pregnancy Average number cigarettes per day							
Alcohol use during pregnancy Average number drinks per week							
Weight gained during pregnancy		44. ABNORMAL CONDITIONS OF THE NEWBORN					
41. OBSTETRIC PROCEDURES							
				46. Has a relative of the baby had a hearing loss that existed since childhood? (Permanent, Hereditary loss)

25. OF HISPANIC ORIGIN?		26. RACE		27. EDUCATION		28. SOCIAL SECURITY NUMBER	
25a. Mother: Yes <input type="checkbox"/> No <input type="checkbox"/> If yes indicate: <input type="checkbox"/> Mexican <input type="checkbox"/> Cuban <input type="checkbox"/> Puerto Rican <input type="checkbox"/> Of Spanish origin not listed.		25b. Father: Yes <input type="checkbox"/> No <input type="checkbox"/> If yes indicate: <input type="checkbox"/> Mexican <input type="checkbox"/> Cuban <input type="checkbox"/> Puerto Rican <input type="checkbox"/> Of Spanish origin not listed.		26a. MOTHER 26b. FATHER		27a. MOTHER 27b. FATHER	
29. PREGNANCY HISTORY (Complete each section)		30. MOTHER MARRIED? (At birth, conception, or any time between) (Yes or No)		31. DATE LAST NORMAL MENSES BEGAN (Month, Day, Year)			
LIVE BIRTHS (Do not include this child)		OTHER TERMINATIONS (Spontaneous and induced at any time after conception)		32. MONTH OF PREGNANCY PRENATAL CARE BEGAN - First, Second, Third, etc. (Specify)			
29a. Now Living Number _____ <input type="checkbox"/> None		29b. Now Dead Number _____ <input type="checkbox"/> None		33. PRENATAL VISITS - Total Number (Including physician, clinic, Health Department visits) Number _____ <input type="checkbox"/> None			
29c. DATE OF LAST LIVE BIRTH (Month, Year)		29d. DATE OF LAST OTHER TERMINATION (Month, Year)		34. BIRTH WEIGHT (Specify unit)			
37. APGAR SCORE		38a. MOTHER TRANSFERRED PRIOR TO DELIVERY? Yes <input type="checkbox"/> No <input type="checkbox"/> If Yes, enter name of facility transferred from: _____		35. CLINICAL ESTIMATE OF GESTATION (Weeks)			
37a. 1 Minute		37b. 5 Minutes		36a. PLURALITY - Single, Twin, Triplet, etc. (Specify)			
		38b. INFANT TRANSFERRED? Yes <input type="checkbox"/> No <input type="checkbox"/> If Yes, enter name of facility transferred to: _____		36b. IF NOT SINGLE BIRTH - Born First, Second, Third, etc. (Specify)			
				39. WHAT PROPHYLACTIC USED IN EYES? (Specify)			
				TIME USED M.			
40a. MEDICAL RISK FACTORS FOR THIS PREGNANCY (Check all that apply)		42. COMPLICATIONS OF LABOR AND/OR DELIVERY (Check all that apply)		45. CONGENITAL ANOMALIES OF CHILD (Check all that apply)			
Anemia (Hct. < 30/Hgb. < 10) 01 <input type="checkbox"/>		Febrile (>100 °F. or 38 °C.) 01 <input type="checkbox"/>		Anencephalus 01 <input type="checkbox"/>			
Cardiac disease 02 <input type="checkbox"/>		Meconium, moderate/heavy 02 <input type="checkbox"/>		Spina bifida/Meningocele 02 <input type="checkbox"/>			
Acute or chronic lung disease 03 <input type="checkbox"/>		Premature rupture of membrane (> 12 hours) ... 03 <input type="checkbox"/>		Hydrocephalus 03 <input type="checkbox"/>			
Diabetes 04 <input type="checkbox"/>		Abruptio placenta 04 <input type="checkbox"/>		Microcephalus 04 <input type="checkbox"/>			
Genital herpes 05 <input type="checkbox"/>		Placenta previa 05 <input type="checkbox"/>		Other central nervous system anomalies (Specify) 05 <input type="checkbox"/>			
Hydramnios/Oligohydramnios 06 <input type="checkbox"/>		Other excessive bleeding 06 <input type="checkbox"/>		Heart malformations (Specify) 06 <input type="checkbox"/>			
Hemoglobinopathy 07 <input type="checkbox"/>		Seizures during labor 07 <input type="checkbox"/>		Other circulatory anomalies (Specify) 07 <input type="checkbox"/>			
Hypertension, chronic 08 <input type="checkbox"/>		Precipitous labor (< 3 hours) 08 <input type="checkbox"/>		Respiratory anomalies (Specify) 08 <input type="checkbox"/>			
Hypertension, pregnancy-associated 09 <input type="checkbox"/>		Prolonged labor (> 20 hours) 09 <input type="checkbox"/>		Rectal atresia/stenosis 09 <input type="checkbox"/>			
Eclampsia 10 <input type="checkbox"/>		Dysfunctional labor 10 <input type="checkbox"/>		Tracheo-esophageal fistula/Esophageal atresia 10 <input type="checkbox"/>			
Incompetent cervix 11 <input type="checkbox"/>		Breech/Malpresentation 11 <input type="checkbox"/>		Omphalocele/Gastroschisis 11 <input type="checkbox"/>			
Previous infant 4000+ grams 12 <input type="checkbox"/>		Cephalopelvic disproportion 12 <input type="checkbox"/>		Other gastrointestinal anomalies (Specify) 12 <input type="checkbox"/>			
Previous preterm or small-for-gestational-age infant 13 <input type="checkbox"/>		Cord prolapse 13 <input type="checkbox"/>		Malformed genitalia 13 <input type="checkbox"/>			
Renal disease 14 <input type="checkbox"/>		Anesthetic complications 14 <input type="checkbox"/>		Renal agenesis 14 <input type="checkbox"/>			
Rh sensitization 15 <input type="checkbox"/>		Fetal distress 15 <input type="checkbox"/>		Other urogenital anomalies (Specify) 15 <input type="checkbox"/>			
Uterine bleeding 16 <input type="checkbox"/>		None 16 <input type="checkbox"/>		Cleft lip/palate 16 <input type="checkbox"/>			
None 17 <input type="checkbox"/>		Other (Specify) 17 <input type="checkbox"/>		Polydactyly/Syndactyly/Adactyly 17 <input type="checkbox"/>			
(Specify) _____				Club foot 18 <input type="checkbox"/>			
				Diaphragmatic hernia 19 <input type="checkbox"/>			
				Other musculoskeletal/integumental anomalies (Specify) 20 <input type="checkbox"/>			
				Down's syndrome 21 <input type="checkbox"/>			
				Other chromosomal anomalies (Specify) 22 <input type="checkbox"/>			
				None 23 <input type="checkbox"/>			
				Other (Specify) 23 <input type="checkbox"/>			
40b. OTHER RISK FACTORS FOR THIS PREGNANCY (Complete all items)		43. METHOD OF DELIVERY (Check all that apply)		46. Has a relative of the baby had a hearing loss that existed since childhood? (Permanent, Hereditary loss) Yes <input type="checkbox"/> No <input type="checkbox"/>			
Tobacco use during pregnancy Yes <input type="checkbox"/> No <input type="checkbox"/>		Vaginal 01 <input type="checkbox"/>					
Average number cigarettes per day Yes <input type="checkbox"/> No <input type="checkbox"/>		Vaginal birth after previous C-section 02 <input type="checkbox"/>					
Alcohol use during pregnancy Yes <input type="checkbox"/> No <input type="checkbox"/>		Primary C-section 03 <input type="checkbox"/>					
Average number drinks per week Yes <input type="checkbox"/> No <input type="checkbox"/>		Repeat C-section 04 <input type="checkbox"/>					
Weight gained during pregnancy lbs.		Forceps 05 <input type="checkbox"/>					
		Vacuum 06 <input type="checkbox"/>					
41. OBSTETRIC PROCEDURES (Check all that apply)		44. ABNORMAL CONDITIONS OF THE NEWBORN (Check all that apply)					
Amniocentesis 01 <input type="checkbox"/>		Anemia (Hct. < 39/Hgb. < 13) 01 <input type="checkbox"/>					
Electronic fetal monitoring 02 <input type="checkbox"/>		Birth injury 02 <input type="checkbox"/>					
Induction of labor 03 <input type="checkbox"/>		Fetal alcohol syndrome 03 <input type="checkbox"/>					
Stimulation of labor 04 <input type="checkbox"/>		Hyaline membrane disease/RDS 04 <input type="checkbox"/>					
Tocolysis 05 <input type="checkbox"/>		Meconium aspiration syndrome 05 <input type="checkbox"/>					
Ultrasound 06 <input type="checkbox"/>		Assisted ventilation < 30 min 06 <input type="checkbox"/>					
None 07 <input type="checkbox"/>		Assisted ventilation ≥ 30 min 07 <input type="checkbox"/>					
Other (Specify) _____		Seizures 08 <input type="checkbox"/>					
		None 09 <input type="checkbox"/>					
		Other (Specify) _____
